

Dear Sirs,I am writting in regards to NAB's petition 04-160. It is my understanding that the National Association of Broadcasters is trying to stop XM Satellite Radio from broadcasting/providing a service which I use on a regular basis, XM Instant Traffic & Weather. I am opposed to this as I am a paying subscriber to XM and should be allowed the benefits of this unique programming. Satellite radio provides variety and quality unavailable elsewhere. If in fact local stations were to provide a similar, consistent, Up-to-date" Weather and Traffic service, I feel this petition would not even be an issue, however, this is not the case. I strongly urge you, the FCC, to reject the NAB's petition 04-160.

Most respectfully yours,
Michael Hudson
